غير مشترك 

* تشير إلى أن السؤال مطلوب

* Monitor the number of test cases executed, passed, and failed to assess progress

Defect Management ☐

Defect Tracking ☐

Progress Tracking ☒

* Compatibility Testing is

Functional Testing ☐

Non FunctionTesting ☒

Performance Testing ☐

* QC has crucial role in SDLC

True ☒

False ☐

* By using metrics, feedback, and meetings we can achieve

Factual Decision Making ☐

Standardization and Compliance ☐

Continuous Improvement ☒

* .Automated testing is always more reliable than manual testing.

True ☐

False ☒

* Manual testing is less expensive

True ☒

False ☐

* Automated testing eliminates the need for manual testing

True ☐

False ☒

* ?What is a disadvantage of Manual testing

Increase Test Coverage ☐

Requires coding knowledge ☐

Reduced reliability ☒

* **Transparency and Traceability** is Quality processes and results should be visible and traceable to maintain clarity and accountability

True ☒

False ☐

* ?Which of the following is **not** an QA activity

Testing ☐

Documentaion ☐

Writing Code ☒

* Regularly test previously developed functionality to confirm that changes have not introduced new defects

Functional testing ☐

Regression testing ☒

Non functional testing ☐

* Performance testing identifies vulnerabilities in the software

True ☐

False ☒

* The testing that can be done frequently thus improving the overall quality of the .software under test

Integration testing ☐

Performance testing ☐

Autmation Testing ☒

* ?What is unitTesting

Testing Individual component ☒

Testing different components ☐

Testing similar components ☐

* Inform relevant stakeholders the test results document and report

Test Closure ☐

Test Reporting ☒

Feedback and improvements ☐

* .Continuous Integration (CI) ensures that code changes are tested frequently

True ☒

False ☐

* Can help improve test coverage

Unit Testing ☐

Automation Testing ☒

Load Testing ☐

* .Test closure activities include documenting lessons learned

True ☒

False ☐

برجاء كتابة الاسم رباى باللغة العربية *

رويدا مصطفى سيد مبروك

* .User Acceptance Testing (UAT) involves end-users or clients

True ☒

False ☐

* Testing the interface between two software units or modules

Integration Testing ☒

Load Integration ☐

Usability testing ☐

* Regularly review QA processes to identify areas for enhancement

. Continuous Improvement and Retrospectives ☒

Defect Tracking and Management ☐

Security Testing ☐

* **Customer Satisfaction** is Software that meets customer expectations and requirements leads to higher satisfaction and loyalty

True ☒

False ☐

* QA Focuses on process to reduce defects

True ☒

False ☐

* a testing technique that looks into an application's core architecture, logic, and implementation

White Box ☒

Grey Box ☐

Black Box ☐

* .The process of locating, analyzing, and fixing defects

Debugging ☒

Testing ☐

Development ☐

* Failure : The inability of the software to perform a required function within specified limits

True ☒

False ☐

* Exploratory testing should be automated

True ☐

False ☒

* Test Product Search

Functional Testing ☒

Non Functional Testing ☐

Performance Testing ☐

* QA is a part of development life cycle

True ☒

False ☐

* .Testing is a preventive process in the software lifecycle

True ☐

False ☒
